VENDOR REFERRAL NETWORK

driver*i*

Driveri® vision based safety by netradyne

Your telematics system should do more than watch the road. It should capture video, analyze the activity and recognize exceptional performance all while providing you with the information you need to reduce driving incidents and protect against false claims.

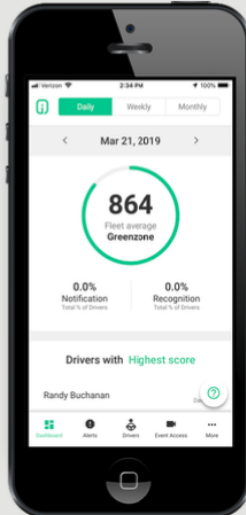

The Driveri® system is flexible and can include:

- External and internal cameras
- Mobile applications
- Alerts in real time powered by A.I.
- 4G/LTE connectivity + Bluetooth/WiFi
- High-definition video

Training & Support

The greatest feature of the system is the on-going training and support you'll receive from the Customer Success Team. The four-step process includes:

1. Pre-Installation Site Survey
2. Installation Training and Support
3. Post-Installation Follow Up
4. Ongoing Support

GreenZone® is the industry's first driver score built on a driver's positive driving rather than focusing on negative events. Your drivers can be recognized for doing well or coached when the need arises.

PRICING

Progressive Fleet customers are eligible for a no cost trial and up to 3-months of free service. (Restrictions apply. Contact Netradyne for details.)
